SPIKES

Activity snowline SPIKES

The original snowline Spikes – offering models for different use cases.

Whether you're walking your dog, trail running on icy paths, crossing snowfields, or hunting in difficult terrain – each scenario demands special features. Snowline offers a wide range of models tailored for various categories:

URBAN – Secure footing in everyday life

Icy sidewalks are no longer an obstacle!
Ideal for commuting or a shopping trip.
Models: HEXA, CITY, TRAIL

RUN – Traction on winter trails

Optimal grip on snowy trails!
Perfect for your favorite running route.
Models: TRAIL, HEXA, LIGHT

HIKE – Hiking on ice & snow

Winter hiking becomes pure fun! Offers grip on snow and safety on icy hiking paths.
Models: WALK, LIGHT

ALPINE – Maximum safety in the mountains

The all-rounders for alpine conditions, as an alternative to crampons on steep ice! Models: LIGHT, PRO, XT

WORK – Safety at work, in hunting & forestry

Indispensable on all types of slippery ground – whether in forestry, rescue work, or on construction sites.
Models: XT, PRO

KIDS – Safety for the little ones!

This model provides better grip while playing in the snow!

Features

Front bar ensures a secure fit

Rust-free stainless steel spikes

High-flex elastomer rubber flexible down to -60°C

Even more durable with reinforced eyelets (except WALK, KIDS)

Stable heel plate (PRO, XT)

Large grip tab on the heel for easier donning and doffing

Choose the right size

Snowline Spikes are available in sizes S to XXL (depending on the model). Choose the best size according to your shoe size: winter boots usually require a larger size than running shoes. If in doubt, opt for a slightly larger size for a better fit. Also, make sure the spikes fit snugly around the sole and do not shift when walking.

Hiking boots	S				M				L				XL				XXL				
Size	31	32	33	34	35	36	37	38	39	40	41	42	43	44	45	46	47	48	49	50	51	52
Winter boots	S				M				L				XL				XXL				
Kids' shoes	26	27	28	29	30	31															
KIDS	XXS			XS

History

Invented by an alpinist –

born out of mountain sports

Made in Korea

Since its founding in **1991**, the Korean mountain sports company **SNOWLINE** has been synonymous with shoe chains with spikes. Since **May 2009**, the products have been manufactured in **Pyeongtaek**, in the neighborhood of Samsung - 85 km south of the South Korean capital Seoul - according to the highest quality standards, packaged and shipped into the world.

In **May 2022**, Mr. Jin-Hong Choi was awarded **„Best CEO"** in South Korea.

Stainless steel

As a **specialist in metal processing** and rubber injection molding, all models are handmade at their own location in Korea. The chain elements and spikes are made of **high-quality stainless steel** and are also suitable for use on icy rock.

High-tech elastomer

Thanks to the elastomer construction, **snowline Spikes** sit firmly on the shoe without the need for additional straps or buckles and can be **put on and taken off in seconds.** The manufacturing standards of snowline spikes are regularly monitored by TÜV.

With Koch alpine for Europe

Since **December 2010**, our company Koch alpin has been the exclusive **sales partner** for snowline Spikes in **Europe** and supplies all leading sports retailers.

Safety & Grip

Slip hazard!

PROBLEM

75% of winter hiking accidents happen due to slipping.

Hard snowfields and icy paths pose a high risk.

Comfort during winter hikes!

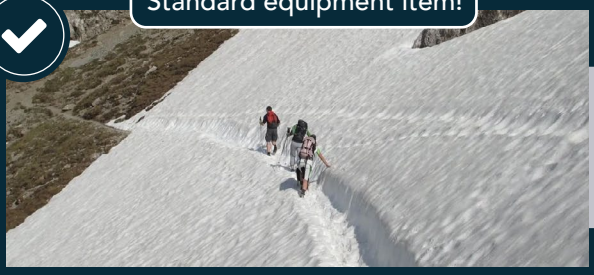

Winter hiking is trending!

But winter boots alone don't provide enough grip on snow – this wastes unnecessary energy and spoils the nature experience.

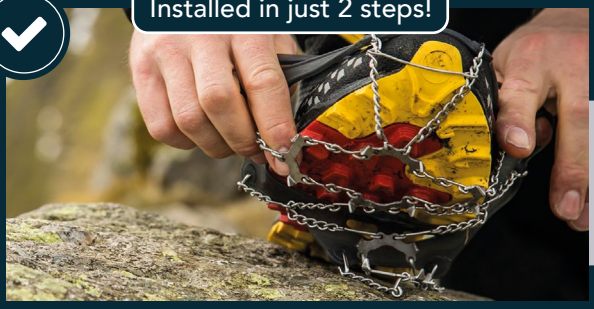

SOLUTION

Standard equipment item!

Snowline Spikes increase safety when crossing snowfields and provide grip on all kinds of slippery surfaces, whether snow, mud, ice, or sludge.

Installed in just 2 steps!

The sophisticated design of modern snowline Spikes allows for quick entry and exit, but still ensures a good grip if the size is right.

Know your limits!

Snowline Spikes are designed for hiking on snow and icy paths, but they are by no means a replacement for proper crampons on high-altitude tours or steep snowfields! Know your limits and those of your equipment!

NEW 25/26

URBAN – Safety on black ice

Icy sidewalks or parking lots are often the cause of falls. Spikes provide maximum safety on ice and slushy snow in the city and can be mounted on any shoe in seconds; CITY even fits on higher heels.

snowline SPIKES HEXA

- ideal for running and street shoes when used in flat terrain and in the city
- 12 carbide spikes, embedded in TPU plastic, for optimal grip
- easy to use, excellent comfort, even on light running shoes
- from 200 g/pair (Size M)

snowline SPIKES CITY

- ideal for icy conditions, even suitable for shoes with heels
- 5 mm short spikes made of stainless steel, only on the forefoot
- tiny pack size
- 80 g/pair (Size M), easily stored in a drawstring pouch

Verein Sicheres Tirol

A partnership for safety!

The mission of the Sicheres Tirol association is to raise awareness and prevent accidents in all areas. All Tyroleans should be sensitized to potential everyday dangers. The motto is „Every accident is one too many." Snowline is a key partner in achieving this goal.

RUN – Traction on winter trails

Light and functional – the spikes in the RUN category let you maintain your pace, even on icy terrain or hard-packed snow. Ideal for lightweight running and trail shoes.

snowline SPIKES TRAIL

- for light shoes for hiking, walking, running or trail running
- 7.5 mm short stainless steel spikes
- slim elastomer rubber for a secure fit
- from 170 g/pair (Size M)

tiny pack size

Trail running in competition

Spikes aren't just for old snowfields but also for muddy paths, icy trails, wet grassy ridges, and slippery root-covered trails. They effectively protect against tripping, falling, and slipping.

Together with snowline at the Trail Running Event:

TRANS ALPINE RUN

PITZTAL SALOMON PITZ ALPINE GLACIER TRAIL

SALOMON ZUGSPITZ ULTRATRAIL

"After last year's preparation for my first trail race had to be canceled due to a severe accident with vertebral fractures, I'm overjoyed to have finally realized the project this summer! This time, the Bernina Ultraks Trail Marathon in Pontresina was on the agenda. 42.5 km and 2,600 meters of altitude over beautiful trails and glaciers in the high mountains of Graubünden. A real sufferfest and all the more emotions at the finish. With snowline Spikes, crossing the glaciers and snowfields was pure enjoyment. Mega grip and valuable energy saved, which I really needed for the later kilometers."

– Celina Weber

HIKE – Hiking on ice & snow

Snowline Spikes not only provide high safety on icy sections but also save a significant amount of energy on snowy winter hiking trails thanks to improved grip. This allows you to enjoy the stunning winter landscape even more intensely! Perfect for any type of winter shoe!

snowline SPIKES WALK

- for various shoes for winter hiking
- 12 mm long spikes for grip on soft snow & mud
- robust elastomer rubber without reinforced eyelets
- from 280 g/pair (Size M), easily stowed in a drawstring pouch

BEST OF WANDERN

BEST OF WINTER

Twice „Best of" – one goal. Strengthening service and sustainability. Guests can try and rent snowline Spikes for free at the „Best of Wandern" test centers. During the „Auf Du und DU mit dem Bergwinter" event from Best of Winter, test snowline Spikes and have fun.

snowline SPIKES KIDS

- for winter boots during playful activities
- 6 short spikes provide safety & ensure fun
- robust elastomer rubber for a secure fit
- from 110 g/pair (Size XXS)

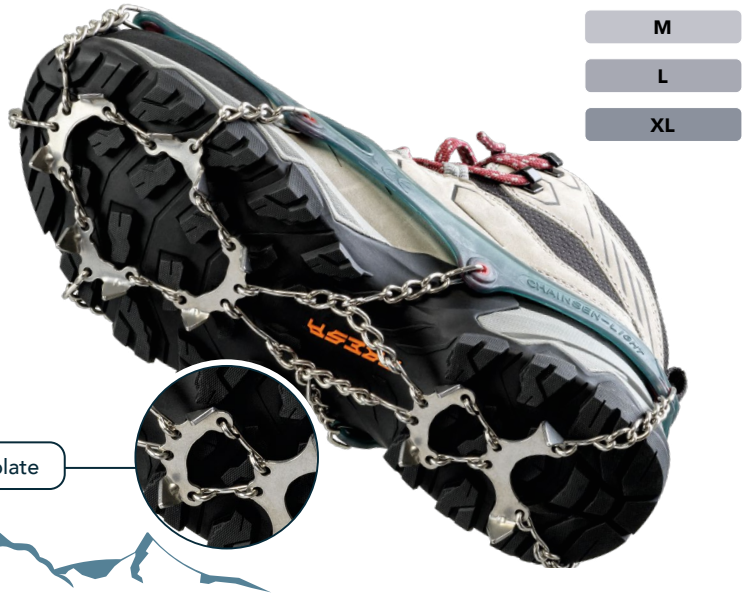

ALPINE – Maximum safety in the mountains

These models provide grip on old snowfields, frozen ground, and off-trail terrain but are not a replacement for crampons on steep glacier passages. Ideal for mountain boots, winter boots, and snowboard boots.

snowline SPIKES LIGHT

- for light shoes for snow running, winter hiking, or trail running
- 12 mm long spikes provide grip
- slim elastomer rubber for a secure fit
- from 230 g/pair (Size M)

SNOWSHOES

... with the right equipment, you can experience an atmospheric winter even when there is little snow!

snowline SPIKES

Pocket-sized safety & grip

Snowline spikes can be quickly and effortlessly mounted on any shoe, providing a secure hold on slippery surfaces, ice, and snow. They are not only useful for leisure but also for workplace safety, hunting, forestry, rescue services, or the military. Thanks to the elastomer rubber construction, they fit securely and can be put on and taken off in seconds. Snowline models are CE-certified, TÜV-tested and come with up to a 5-year warranty.
